

# COVID-19 surveillance report for renal centres in the UK

All regions and centres – 1 September to 27 January 2021

## **ABOUT THIS REPORT**

These reports are produced by the UK Renal Registry (UKRR) using data submitted by renal centres in response to the COVID-19 pandemic. The first report was circulated on Friday 27 March 2020. The UKRR produced a summary report of the first wave (1 March to 31 August 2020) on 4 December 2020. Reports from December 2020 onwards only include data from the second wave, i.e. 1 September 2020 onwards.

The reports are primarily about adults aged  $\geq$ 18 years, as well as young adults aged 16–18 years, if they are under the care of an adult renal centre. However, also reported in the key points are aggregate data submitted by paediatric renal centres.

The data collected are deliberately limited so as not to add significantly to the burden of work in renal centres.

## **DEFINITIONS**

A renal patient with COVID-19 is:

• an individual who has a positive laboratory result for SARS-COV-2.

This definition was updated for the report on 28 October 2020 to reflect changes and variability in COVID-19 testing strategies across renal centres.

A renal patient whose death is attributed to COVID-19 is:

• an individual who died within 28 days of a positive laboratory result for SARS-COV-2.

This definition was updated for the report on 26 August 2020 following the introduction of the new UK-wide methodology to record COVID-19 deaths.

## **SUGGESTED CITATION & DISCLAIMER**

UK Renal Registry (2021) COVID-19 surveillance report for renal centres in the UK: All regions and centres. The Renal Association, Bristol, UK.

Publications based on the data presented in this report must include the citation detailed above and the following disclaimer:

The data reported here have been supplied by the UK Renal Registry (UKRR) of the Renal Association. The interpretation and reporting of these data are the responsibility of the authors and in no way should be seen as an official policy or interpretation of the UKRR or the Renal Association.

## **KEY POINTS**

For the week ending Wednesday 27 January 2021:

- adult renal centres 50 of the 51 centres in England, 5 of the 5 centres in Northern Ireland and 5 of the 5 centres in Wales submitted COVID-19 data to the UK Renal Registry (UKRR). <u>Public Health Scotland</u> collects Scottish COVID-19 data via the <u>Scottish Renal Registry</u>. Cumulative data from 1 September 2020 to 10 January 2021 were included for 9 of the 9 centres in Scotland.
- **paediatric renal centres** 12 of the 13 centres in England, Northern Ireland, Scotland and Wales submitted COVID-19 data to the UKRR.

#### The most recent 10 weeks of the pandemic in adult renal centres (CKD and RRT patients)

Over the last 10 weeks, all regions and countries have seen increased numbers of new cases and deaths. In all three countries and almost all regions of England, new cases peaked around the middle of January and are now starting to fall.

#### In adult renal centres in England:

- in the last week (Thurs–Wed) the number of new laboratory-confirmed cases of COVID-19 was 342
- from 1 September to 27 January 2021 the cumulative number of laboratory-confirmed cases of COVID-19 was 5,944
- in the last week (Thurs–Wed) the number of new deaths attributed to COVID-19 was 84
- from 1 September to 27 January 2021 the cumulative number of deaths attributed to COVID-19 was 1,179.

#### In adult renal centres in Northern Ireland:

- in the last week (Thurs–Wed) the number of new laboratory-confirmed cases of COVID-19 was 3
- from 1 September to 27 January 2021 the cumulative number of laboratory-confirmed cases of COVID-19 was 130
- in the last week (Thurs–Wed) the number of new deaths attributed to COVID-19 was 1
- from 1 September to 27 January 2021 the cumulative number of deaths attributed to COVID-19 was 13.

#### In adult renal centres in Scotland:

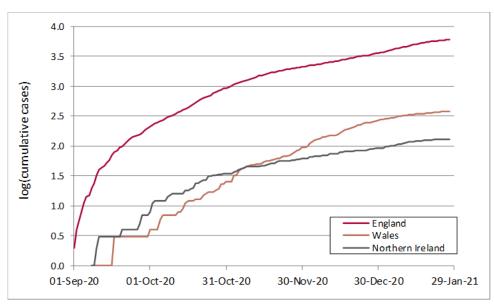

- from 1 September to 10 January 2021 the cumulative number of laboratory-confirmed cases of COVID-19 was 185
- from 1 September to 10 January 2021 the cumulative number of deaths attributed to COVID-19 was 23.

#### In adult renal centres in Wales:

- in the last week (Thurs–Wed) the number of new laboratory-confirmed cases of COVID-19 was 23
- from 1 September to 27 January 2021 the cumulative number of laboratory-confirmed cases of COVID-19 was 385
- in the last week (Thurs–Wed) the number of new deaths attributed to COVID-19 was 1
- from 1 September to 27 January 2021 the cumulative number of deaths attributed to COVID-19 was 87.

#### The course of the second wave of the pandemic in adult renal centres (CKD and RRT patients)

Figure 1 shows the cumulative number of laboratory-confirmed COVID-19 cases from 1 September to 27 January 2021 in adult renal centres in England, Northern Ireland and Wales. At the start of the second wave of the pandemic, in all three countries, the number of cases climbed steeply until the middle of November when they started to plateau in England and Northern Ireland. Cases in Wales steadied in the second half of December, while England experienced another steep increase from the end of December until the middle of January. Numbers of new cases in all three countries have now plateaued and are starting to decline.

**Figure 1** Log cumulative counts of laboratory-confirmed COVID-19 cases in CKD and RRT patients between 1 September and 27 January 2021 in adult renal centres in England, Northern Ireland and Wales

#### In paediatric renal centres in England, Northern Ireland, Scotland and Wales:

- in the last week (Thurs–Wed) the number of new laboratory-confirmed cases of COVID-19 was 4
- from 1 September to 27 January 2021 the cumulative number of laboratory-confirmed cases of COVID-19 was 60.

## SURVEILLANCE

### ALL REGIONS AND ADULT CENTRES IN ENGLAND, NORTHERN IRELAND, SCOTLAND AND WALES

**Table 1** Number of new and cumulative reported laboratory-confirmed COVID-19 cases in CKD and RRT patients within the last 7 days (Thursday 21 January to Wednesday 27 January 2021) and from 1 September to Wednesday 27 January 2021, respectively, in adult renal centres in England, Northern Ireland, Scotland and Wales by region, renal centre and country

<sup>1</sup>Numbers of deaths attributed to COVID-19 are lower than in reports prior to 26 August 2020 because the updated definition restricts a COVID-19 death to one that occurred within 28 days of a positive test.

<sup>2</sup>Data from University Hospitals Birmingham NHS Foundation Trust (Heartlands Hospital & Queen Elizabeth Hospital).

<sup>3</sup>Scotland reported cumulative cases from 1 September to 10 January 2021.

The delay between the NHS tracing process and producing this report may result in a possible underestimation of the number of deaths.

Blank cells indicate that the renal centre did not submit data to the UKRR.

 Table 3

<sup>1</sup>Data from University Hospitals Birmingham NHS Foundation Trust (Heartlands Hospital & Queen Elizabeth Hospital).

<sup>2</sup>The number of cases reported in the most recent week is likely to be an underestimation, because of the lag in reporting to the UKRR.

Blank cells indicate that the renal centre did not submit data to the UKRR.

ENGLAND	57,510	60	61	67	61	85	85	103	146	136	84
NORTHERN IRELAND	1,931	0	0	1	1	0	0	1	1	1	1
WALES	3,315	6	4	12	7	17	9	9	6	7	1

<sup>1</sup>Data from University Hospitals Birmingham NHS Foundation Trust (Heartlands Hospital & Queen Elizabeth Hospital).

<sup>2</sup>The number of cases reported in the most recent week is likely to be an underestimation, because of the lag in reporting deaths to the UKRR and the delay in tracing deaths.
