

COVID-19 surveillance report for renal centres in the UK

All regions and centres – 1 September 2020 to 30 June 2021

ABOUT THIS REPORT

These reports are produced by the UK Renal Registry (UKRR) using data submitted by renal centres in response to the COVID-19 pandemic. The first report was circulated on Friday 27 March 2020. The UKRR produced a summary report of the first wave (1 March to 31 August 2020) on 4 December 2020. Reports from December 2020 onwards only include data from the second wave, i.e. 1 September 2020 onwards.

The reports are primarily about adults aged ≥18 years, as well as young adults aged 16–18 years, if they are under the care of an adult renal centre. However, also reported in the key points are aggregate data submitted by paediatric renal centres.

The data collected are deliberately limited so as not to add significantly to the burden of work in renal centres.

DEFINITIONS

A renal patient with COVID-19 is:

• an individual who has a positive laboratory result for SARS-COV-2.

This definition was updated for the report on 28 October 2020 to reflect changes and variability in COVID-19 testing strategies across renal centres.

A renal patient whose death is attributed to COVID-19 is:

• an individual who died within 28 days of a positive laboratory result for SARS-COV-2.

This definition was updated for the report on 26 August 2020 following the introduction of the new UK-wide methodology to record COVID-19 deaths.

SUGGESTED CITATION & DISCLAIMER

UK Renal Registry (2021) COVID-19 surveillance report for renal centres in the UK: All regions and centres. The Renal Association, Bristol, UK.

Publications based on the data presented in this report must include the citation detailed above and the following disclaimer:

The data reported here have been supplied by the UK Renal Registry (UKRR) of the Renal Association. The interpretation and reporting of these data are the responsibility of the authors and in no way should be seen as an official policy or interpretation of the UKRR or the Renal Association.

KEY POINTS

For the week ending Wednesday 30 June 2021:

- adult renal centres 47 of the 51 centres in England, 4 of the 5 centres in Northern Ireland and 5 of the 5 centres in Wales submitted COVID-19 data to the UK Renal Registry (UKRR).
- paediatric renal centres 11 of the 13 centres in England, Northern Ireland, Scotland and Wales submitted COVID-19 data to the UKRR.

The most recent 10 weeks of the pandemic in adult renal centres (CKD and RRT patients)

After the peak in new COVID-19 cases around mid-January, the general trend has been downwards. Over the past month, the number of cases has remained low in most regions. There are, however, a few exceptions, for example, small increases in the West Midlands and North West.

In adult renal centres in England:

- in the last week (Thurs–Wed) the number of new laboratory-confirmed cases of COVID-19 was 38
- from 1 September 2020 to 30 June 2021 the cumulative number of laboratory-confirmed cases of COVID-19 was 7,533
- in the last week (Thurs—Wed) the number of new deaths attributed to COVID-19 was 4
- from 1 September 2020 to 30 June 2021 the cumulative number of deaths attributed to COVID-19 was 1,742.

In adult renal centres in Northern Ireland:

- in the last week (Thurs—Wed) the number of new laboratory-confirmed cases of COVID-19 was 1
- from 1 September 2020 to 30 June 2021 the cumulative number of laboratory-confirmed cases of COVID-19 was 178
- in the last week (Thurs-Wed) the number of new deaths attributed to COVID-19 was 0
- from 1 September 2020 to 30 June 2021 the cumulative number of deaths attributed to COVID-19 was 16.

In adult renal centres in Wales:

- in the last week (Thurs—Wed) the number of new laboratory-confirmed cases of COVID-19 was 2
- from 1 September 2020 to 30 June 2021 the cumulative number of laboratory-confirmed cases of COVID-19 was 554
- in the last week (Thurs—Wed) the number of new deaths attributed to COVID-19 was 0
- from 1 September 2020 to 30 June 2021 the cumulative number of deaths attributed to COVID-19 was 153.

The course of the second wave of the pandemic in adult renal centres (CKD and RRT patients)

Figure 1 shows the cumulative number of laboratory-confirmed COVID-19 cases from 1 September 2020 to 30 June 2021 in adult renal centres in England, Northern Ireland and Wales. At the start of the second wave of the pandemic, in all three countries, the number of cases climbed steeply until the middle of November when they started to plateau in England and Northern Ireland. Cases in Wales steadied in the second half of December, while England experienced another steep increase from the end of December until the middle of January. Numbers of new cases then decreased steadily in all three countries and curves plateaued until June when numbers started to increase slowly in England.

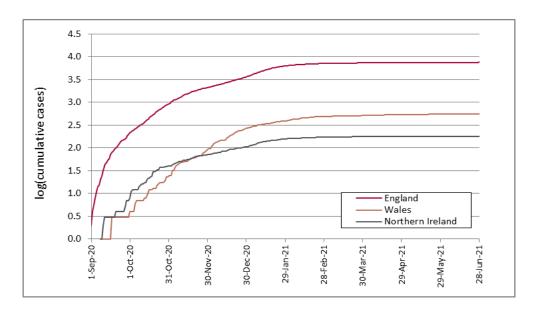

Figure 1 Log cumulative counts of laboratory-confirmed COVID-19 cases in CKD and RRT patients between 1 September 2020 and 30 June 2021 in adult renal centres in England, Northern Ireland and Wales

In paediatric renal centres in England, Northern Ireland, Scotland and Wales:

- in the last week (Thurs–Wed) the number of new laboratory-confirmed cases of COVID-19 was 0
- from 1 September 2020 to 30 June 2021 the cumulative number of laboratory-confirmed cases of COVID-19 was 108
- From 1 September 2020 to 30 June 2021 there has been 1 death attributed to COVID-19, but the child had significant underlying health conditions.

SURVEILLANCE

¹Data from University Hospitals Birmingham NHS Foundation Trust (Heartlands Hospital & Queen Elizabeth Hospital).

Blank cells indicate that the renal centre did not submit data to the UKRR.

CKD – chronic kidney disease (i.e. patients with CKD not on RRT); HHD – home haemodialysis; HT – home therapies; ICHD – in-centre haemodialysis; PD – peritoneal dialysis; RRT – renal replacement therapy; TPLT – transplant; Missing – treatment modality data missing

Table 2 Number of new and cumulative reported deaths within 28 days of laboratory-confirmed COVID-19 in CKD and RRT patients within the last 7 days (Thursday 24 May to Wednesday 30 June 2021) and from 1 September 2020 to Wednesday 30 June 2021, respectively, in adult renal centres in England, Northern Ireland and Wales by region, renal centre and country

¹Numbers of deaths attributed to COVID-19 are lower than in reports prior to 26 August 2020 because the updated definition restricts a COVID-19 death to one that occurred within 28 days of a positive test.

The delay between the NHS tracing process and producing this report may result in a possible underestimation of the number of deaths. Blank cells indicate that the renal centre did not submit data to the UKRR.

CKD – chronic kidney disease (i.e. patients with CKD not on RRT); HHD – home haemodialysis; HT – home therapies; ICHD – in-centre haemodialysis; PD – peritoneal dialysis; RRT – renal replacement therapy; TPLT – transplant; Missing – treatment modality data missing

²Data from University Hospitals Birmingham NHS Foundation Trust (Heartlands Hospital & Queen Elizabeth Hospital).
